

1. Record Nr.	UNINA9910688578303321
Titolo	Burden of Respiratory Syncytial Virus Infection in the Young / / edited by Bernhard Resch
Pubbl/distr/stampa	London, England : , : IntechOpen, , 2019
Descrizione fisica	1 online resource (108 pages)
Disciplina	579.2
Soggetti	Viruses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Respiratory syncytial virus (RSV) causes seasonal epidemics during the winter and wet seasons, particularly in young children. Although there is one drug available for prophylaxis, palivizumab, it is indicated for high-risk children only. Therefore a vaccine is urgently needed. This book provides an overview of RSV and discusses its incidence and presentation in different populations, including preterm infants and children with congenital heart disease. It also discusses future strategies for RSV prophylaxis and developments in and barriers to creating a viable vaccine.</p>
