

1. Record Nr.	UNINA9910688579803321
Titolo	Biological Activity of Natural Secondary Metabolite Products // edited by Toshio Morikawa
Pubbl/distr/stampa	Basel, Switzerland : , : MDPI, , 2018
ISBN	9783038971757 3038971758
Descrizione fisica	1 online resource (466 pages)
Disciplina	570.285
Soggetti	Metabolites
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Natural secondary metabolite products, which are isolated from plants, animals, microorganisms, et cetera, are classified as polyketides, isoprenoids, aromatics (phenylpropanoids), alkaloids, et cetera Their chemical diversity and variety of biological activities have attracted the attention of chemists, biochemists, biologists, et cetera The Special Issue on "Biological Activity of Natural Secondary Metabolite Products" is intended to offer biological active natural products as candidates and/or leads for pharmaceuticals, dietary supplements, functional foods, cosmetics, food additives, et cetera The research fields of this Special Issue include natural products chemistry, phytochemistry, pharmacognosy, food chemistry, bioorganic synthetic chemistry, chemical biology, molecular biology, molecular pharmacology, and other related research fields of bioactive natural secondary metabolite products. Original research and review articles on all topics in these research fields are invited. I am looking forward to receiving many submissions from outstanding experts in these research fields.
