1. Record Nr. UNINA9910688581803321 Lupus: new advances and challenges / / edited by Sophia Lionaki Titolo London, England:,: IntechOpen,, 2020 Pubbl/distr/stampa Descrizione fisica 1 online resource (138 pages) Disciplina 616.77 Soggetti Systemic lupus erythematosus Systemic lupus erythematosus - Alternative treatment Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Systemic lupus erythematosus, the prototype of an autoimmune Sommario/riassunto disorder, may affect several organs and may run a chronic course between relapse and remission. This book covers important aspects of the disease, including epidemiology, pathophysiology, and neuropsychiatric manifestations, including basic science and clinical features and management. In affected patients, the fundamental problem of fertility is reassessed including the risk of the disease, the possibility of fetal loss, the safety of drugs during pregnancy, and the current diagnostic and suggested therapeutic strategies of reproductive medicine. Finally, the issue of pathogenesis is revisited with a thorough description of animal models in relation to physiology and potential

novel therapies.
