Sommario/riassunto

This is the latest report in a process towards International Cataloguing Principles that began in 2003 and will continue through 2007. Through the series of meetings represented by each volume the reader will be able to track the development and consultation taking place throughout the different parts of the world that will culminate with the creation of a truly international set of principles to guide the development of cataloguing codes worldwide. This volume contains information in English and Arabic on the recommendations of cataloguing experts from countries in the Arabic-speaking Middle

Sommario/riassunto

"Emerging in the throes of a global pandemic that threatens Europe's economies and food security, International Labour Migration to Europe's Rural Regions combines a diverse range of empirically rich, in-depth case studies, analysis of their rural context specificities, and insights from labour market and migration theories, to critically examine the conditions and implications of rural labour migration.

Despite its growing political, economic and social importance, our understanding of international labour migration to Europe's rural regions remains limited. This edited volume provides intricate descriptions of lived experience, critical theoretical analyses, analytical synthesis, and policy recommendations for this novel and developing phenomenon that has the potential to transform the lives of international migrants and local communities. The book's 25 authors represent a wide range of social science disciplines, with coverage of a vast range of Europe's rural regions, and diverse types of rural labour in areas such as horticulture, shepherding, wild berry picking and fish processing. The volume will be of interest to policy makers at local, regional, national and European levels, and scholars and students in a broad range of areas, including migration, labour markets, and rural studies"-- Provided by publisher.
