

1. Record Nr.	UNINA9910689561803321
Titolo	Subsidy rate calculation : an unfair tax on small business : hearing before the Committee on Small Business, House of Representatives, One Hundred Seventh Congress, second session, Washington, DC, March 13, 2002
Descrizione fisica	1 online resource (iii, 85 p.) : ill
Soggetti	Small business - United States - Finance Commercial credit - United States Loans - United States - Government guaranty Subsidies - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910557134303321
Autore	Loja Maria Amelia Ramos
Titolo	Numerical and Symbolic Computation : Developments and Applications
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (140 p.)
Soggetti	History of engineering and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book is a comprehensive set of articles reflecting on the application of symbolic and/or numerical computation in a range of scientific areas within the fields of engineering and science. These

articles constitute extended versions of communications presented at the 4th International Conference on Numerical and Symbolic Computation-SYMCOMP 2019—that took place in Porto, Portugal, from 11 to 12 April 2019. The different chapters present diverse perspectives on the existing effective connections between mathematical methods and procedures and other knowledge areas. The intrinsic multidisciplinary character is visible throughout the whole book as a result of the applicability of the scope and the applications considered. The reader will find this book to be a useful resource for identifying problems of interest in different engineering and science areas, and in the development of mathematical models and procedures used in the context of prediction or verification computational tools as well as in the aided-learning/teaching context. This book is a must-read for anyone interested in the recent developments and applications of symbolic and numerical computation for a number of multidisciplinary engineering and science problems.
