

1. Record Nr.	UNINA9910690262103321
Titolo	Entrez browser [[electronic resource]]
Pubbl/distr/stampa	[Bethesda, MD], : National Center for Biotechnology Information, <1996- >
Edizione	[Electronic version.]
Descrizione fisica	1 online resource
Altri autori (Persone)	BrylawskiBrandon EpsteinJonathan
Soggetti	Health - Research Medicine - Research Molecular Biology Nucleotides Proteins Bibliography
Lingua di pubblicazione	Inglese
Formato	Multimedia
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Feb. 20, 2008).
Sommario/riassunto	Describes the Entrez Browser, an online database search engine for retrieving molecular biology-related citations and records from the National Center for Biotechnology Information (NCBI) databases. Entrez accesses the molecular biology subset of the National Library of Medicine's database of biomedical articles; proteins from worldwide databases; and nucleotides from the NCBI GenBank. Includes search instructions and help files. Links to the NCBI home page and the GenBank Sequence Database home page. Accesses the Medline database.
