

1. Record Nr.	UNINA9910690461403321
Titolo	The Nation's largest learning laboratory [[electronic resource]] : CIREN, Crash Injury Research & Engineering Network
Pubbl/distr/stampa	[Washington, D.C.?], : National Highway Traffic Safety Administration, [1996-]
Soggetti	Crash injuries - Research - United States Traffic accidents - Research - United States Trauma centers - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen.
Sommario/riassunto	CIREN, founded in 1996, the Crash Injury Research & Engineering Network, is a group of trauma centers and their associated universities in different parts of the U.S. that are linked by computers and that share information concerning injuries due to automobile accidents. The goal of CIREN, funded by NHTSA and General Motors, is to design safer cars to help prevent severe injuries from accidents. Some of the documents available at CIREN include general information about CIREN, and papers from a conference sponsored by CIREN.
