

1. Record Nr.	UNINA9910690716903321
Titolo	The Official U.S. time [[electronic resource]]
Pubbl/distr/stampa	[Boulder, Colo.], : National Institute of Standards and Technology, Physics Laboratory, Time and Frequency Division Washington, D.C., : U.S. Naval Observatory, 2000-
Soggetti	Atomic clocks Clocks and watches Time - Systems and standards - United States Calendars.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen.
Sommario/riassunto	A "clickable" time zone map of the United States takes the user to another screen that shows the correct time for states in that time zone. The "time exhibits" link takes the user to government and non-government sites showing various ways time has been measured over the centuries. These sites include: A walk through time (history of timekeeping); Calendars through the ages (with information on days, weeks, months, and years); Daylight saving time; ClockWorks (shows clock mechanisms); It's about time (advances in timekeeping accuracy and atomic clocks); and the Quartz Watch (inside the wristwatch).
