Sommario/riassunto	"What is the relationship between education and those seeking asylum or refuge? What is the impact of education being marginalized during

conflict situations? Drawing on international research in numerous countries, including Thailand, North Korea, Lebanon, Africa, the USA and the UK, the contributors consider, conceptually and empirically, the provision of education to refugees and asylum seekers in their homeland or in host countries, analyzing the internal and external factors affecting educational provision during and after emergencies. Each chapter contains a summary of the key points and issues within the chapter to enable easy navigation, key contemporary questions to encourage you to actively engage with the material and an annotated list of suggested further reading to support you to take your exploration further. A companion website supports the text and provides updates and additional resources."--
