

1. Record Nr.	UNINA9910619276303321
Titolo	Genomic designing for biotic stress resistant technical crops // edited by Chittaranjan Kole
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783031092930 9783031092923
Descrizione fisica	1 online resource (635 pages)
Disciplina	344.73046
Soggetti	Agricultural pests Crops - Effect of stress on
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Contributors -- Abbreviations -- 1 Genomic Designing for Biotic Stress Resistant Cassava -- 1.1 Biotic Stress in Cassava -- 1.1.1 Prevalent Cassava Biotic Factors -- 1.1.2 Regional Incidence of Cassava Pests and Diseases -- 1.1.3 Economic Impact of Biotic Stress on Cassava Production and Utilization -- 1.2 Biotic Factors Affecting Cassava Production -- 1.2.1 Diseases -- 1.2.2 Pests -- 1.3 Approaches for Developing Biotic Stress Resistant Cassava Varieties -- 1.3.1 Conventional Breeding Approach for Developing Biotic Stress Resistant Cassava Varieties -- 1.3.2 Molecular Techniques for Biotic Stress Improvement in Cassava -- 1.3.3 The Adoption of Genetic Engineering in Genomic Designing for Biotic Stress Resistant Cassava -- 1.3.4 Genome Editing in Genomic Designing for Biotic Stress Resistant Cassava -- 1.4 Future Perspectives in the Genomic Designing for Biotic Stress Resistant Cassava -- References -- 2 Genomic Designing for Biotic Stress Resistant Cocoa Tree -- 2.1 Introduction -- 2.2 Description on Different Biotic Stresses -- 2.2.1 Frosty Pod Rot of Cocoa -- 2.2.2 Witches' Broom Disease -- 2.2.3 Black Pod Rot -- 2.2.4 Ceratocystis Wilt of Cacao -- 2.2.5 Cocoa Swollen Shoot Virus -- 2.2.6 Other Diseases and Pests -- 2.3 Genetic Resources of Resistance Genes -- 2.4 Glimpses on Classical Genetics and Traditional Breeding -- 2.4.1 Breeding Objectives -- 2.4.2

Classical Mapping Efforts -- 2.4.3 Classical Breeding Achievements --
 2.4.4 Limitations of Traditional Breeding and Rationale for Molecular
 Breeding -- 2.5 Brief on Diversity Analysis of Cocoa Germplasm --
 2.5.1 Phenotype-Based Diversity Analysis -- 2.5.2 Genotype-Based
 Diversity Analysis -- 2.6 Brief Account of Molecular Mapping
 of Resistance Genes and QTLs -- 2.6.1 Genetic Maps of Cocoa, Marker
 Evolution and Segregating Populations.
 2.6.2 QTL Regions Disease Resistance in Cocoa -- 2.7 Cocoa
 Germplasm Characterization -- 2.8 Map-Based Cloning of Resistance
 Genes -- 2.8.1 BAC Libraries -- 2.8.2 Cytogenetic Studies -- 2.9
 Genomics-Aided Breeding for Resistance Traits -- 2.9.1 Large Scale
 Transcriptomic Resources -- 2.9.2 Genome Sequencing -- 2.9.3
 Proteomics Resources -- 2.9.4 Bases for Marker Assisted Selection --
 2.10 Brief on Genetic Engineering for Resistance Traits and Recent
 Concepts and Strategies Developed -- 2.10.1 Review on Achievements
 of Transgenics -- 2.10.2 Genome Editing -- 2.10.3 Nanotechnology --
 2.11 Brief Account on Tole of Bioinformatics as a Tool -- 2.11.1 Gene
 and Genome Databases -- 2.11.2 Comparative Genome Databases --
 2.11.3 Gene Expression Databases -- 2.11.4 Protein Databases --
 2.11.5 Integration of Different Data -- References -- 3 Genomic
 Designing for Biotic Stress Resistance in Coconut -- 3.1 Introduction --
 3.2 Diseases of Coconut -- 3.2.1 Leaf Rot -- 3.2.2 Bud Rot -- 3.2.3
 Stem Bleeding -- 3.2.4 Ganoderma Wilt/Basal Stem Rot -- 3.2.5
 Immature Nut Fall -- 3.2.6 Grey Leaf Spot -- 3.2.7 Lasiodiplodia Leaf
 Blight of Coconut -- 3.2.8 Phytoplasmal Diseases of Coconut -- 3.2.9
 Diseases Caused by Viruses and Viroids -- 3.3 Pests of Coconut -- 3.4
 Genetic Resources of Resistance/Tolerance Genes -- 3.5 Classical
 Genetics and Traditional Breeding -- 3.6 Association Mapping Studies
 -- 3.7 Molecular Mapping of Resistance Genes and QTLs and Marker-
 Assisted Breeding -- 3.8 Genomics-Aided Breeding for Resistance
 Traits -- 3.8.1 Whole-Genome Sequence Assemblies -- 3.8.2
 Transcriptomic Approaches -- 3.9 Conclusion and Future Perspectives
 -- References -- 4 Current Challenges and Genomic Advances Toward
 the Development of Coffee Genotypes Resistant to Biotic Stress -- 4.1
 Introduction -- 4.2 Genomic Analyses for Major Biotic Stresses
 in Coffee.
 4.3 Transcriptome Studies for Major Biotic Stresses in Coffee -- 4.4
 Genetic Transformation, RNAi, and Genome Editing for Biotic Stress
 in Coffee -- 4.5 Breeding for Biotic Stress Resistance in Coffee: Some
 Case Studies -- 4.5.1 Coffee Leaf Rust (CLR) -- 4.5.2 Coffee Berry
 Disease (CBD) -- 4.5.3 Bacterial Halo Blight (BHB) -- 4.5.4 Nematodes
 -- 4.5.5 Coffee Leaf Miner (CLM) -- 4.5.6 Coffee Berry Borer (CBB) --
 4.6 Final Remarks -- References -- 5 Disease Resistance in Cotton --
 5.1 Introduction -- 5.2 Bacterial Blight -- 5.2.1 Causal Agent
 and Significance -- 5.2.2 Resistant Germplasm -- 5.2.3 Genetics
 of Resistance -- 5.2.4 Resistance Breeding -- 5.2.5 Molecular Mapping
 of BB Resistance Genes -- 5.2.6 Marker-Assisted Selection (MAS) -- 5.3
 Verticillium Wilt -- 5.3.1 Causal Agent and Significance -- 5.3.2
 Screening Techniques and Resistance Sources -- 5.3.3 Resistance
 Breeding -- 5.3.4 Genetics of Resistance -- 5.3.5 Mapping
 of Verticillium Wilt Resistance QTLs -- 5.3.6 Marker-Assisted Selection
 for VW Resistance -- 5.4 Fusarium Wilt -- 5.4.1 Causal Agent
 and Significance -- 5.4.2 Sources of Resistance -- 5.4.3 Resistance
 Breeding -- 5.4.4 Genetics of Resistance -- 5.4.5 Molecular Mapping
 of FW Resistance Quantitative Trait Loci -- 5.4.6 Molecular Breeding
 Techniques -- 5.5 Future Prospects -- References -- 6 Conventional
 and Molecular Interventions for Biotic Stress Resistance in Floricultural
 Crops -- 6.1 Introduction -- 6.2 Biotic Stress in Floriculture Crops --

6.3 Different Approaches to Alleviate Biotic Stress in Ornamentals --
6.3.1 Conventional Breeding -- 6.3.2 Molecular Approaches -- 6.4
Conclusion -- References -- 7 Genomics for Biotic Stress Tolerance
in Jute -- 7.1 Introduction -- 7.1.1 Economic Importance -- 7.1.2
Reduction in Yield and Quality Due to Biotic Stresses -- 7.1.3 Growing
Importance in the Face of Climate Change.
7.1.4 Limitations of Traditional Breeding and Rationale of Genome
Designing -- 7.2 Description on Different Biotic Stresses -- 7.2.1 Major
Insect-Pests of Jute and Their Management -- 7.2.2 Diseases of Jute --
7.3 Traditional Breeding Methods -- 7.3.1 Intraspecific Hybridization
-- 7.3.2 Interspecific Hybridization -- 7.3.3 Limitations of Classical
Genetics and Breeding in Developing Resistant Cultivars -- 7.4 Genetic
Resources of Resistance Genes -- 7.5 Resistance Gene-Based Marker
Development and Utilization -- 7.5.1 Utilization of Resistance Gene-
Based Genic Markers for Domestication and Population Genetic
Analyses in Jute -- 7.5.2 Use in Phylogenetic Analysis -- 7.5.3 Use
of RGA in Population Structure Analysis -- 7.6 Genomics-Aided
Breeding for Resistance Traits -- 7.6.1 Genomics to Decipher Plant-
Pathogen Interaction Pathways in Jute -- 7.6.2 Genomics for Identifying
Genes Involved in Resistance to Stem Rot Disease -- 7.6.3 Genomics
for Deciphering Systemic Acquired Resistance -- 7.6.4 Deciphering
Role of Chitinase in Resistance -- 7.7 Brief Account of Molecular
Mapping of Resistance Genes and QTLs -- 7.8 Brief on Genetic
Engineering for Resistance Traits -- 7.9 Future Perspectives --
References -- 8 Genomic Designing for Biotic Stress Resistance
in Mulberry -- 8.1 Introduction -- 8.1.1 Economic Significance -- 8.1.2
Effect of Biotic Stress on Yield and Quality -- 8.1.3 Increasing
Population and Climate Change Scenario -- 8.1.4 Logical of Genome
Designing and Bottlenecks of Traditional Breeding -- 8.2 Description
of Different Pathogens Causing Biotic Stress in Mulberry -- 8.2.1 Major
Diseases in Mulberry -- 8.2.2 Major Insect and Pests in Mulberry -- 8.3
Germplasm Resources for Disease Resistance -- 8.3.1 Primary Gene
Pool -- 8.3.2 Secondary Gene Pool -- 8.3.3 Tertiary Gene Pool -- 8.3.4
Artificially Induced/Incorporated Traits/Genes.
8.4 Overview on Classical Genetics and Traditional Breeding -- 8.4.1
Traditional Breeding Methods -- 8.4.2 Breeding Objectives: Positive
and Negative Selection -- 8.4.3 Achievements of Conventional Breeding
(Quality, Stress Resistance, Yield etc.) -- 8.4.4 Constrains
of Conventional Breeding and Basis for Molecular Breeding -- 8.4.5
Classical Mapping Efforts and Its Limitations and Utility of Molecular
Mapping If Any -- 8.4.6 Use of Morphological Markers -- 8.4.7
Limitations and Prospect of Genomic Designing -- 8.5 Diversity
Analysis in Brief -- 8.5.1 Diversity Analysis Based on Phenotype --
8.5.2 Diversity Analysis Based on Genotype, Molecular Markers Applied
-- 8.5.3 Relationship with Other Cultivated Species and Wild Relatives
-- 8.5.4 Association with Geographical Distribution -- 8.5.5 Scope
of Genetic Diversity -- 8.6 Association Mapping Studies -- 8.6.1
Genome Wide LD Studies -- 8.6.2 Future Potential for the Application
of Association Studies for Germplasm Enhancement -- 8.7 Map-Based
Cloning of Resistance/Tolerance Genes -- 8.7.1 Traits and Genes --
8.8 Genomics-Assisted Breeding for Resistance/Tolerance Traits --
8.8.1 Functional and Structural Genomic Resources Developed -- 8.8.2
Genome Sequencing, Assembly and Annotation -- 8.8.3 Impact
on Gene Discovery and Germplasm Characterization -- 8.9 Recent
Concepts and Strategies Developed -- 8.9.1 Gene Editing -- 8.10 Brief
on Genetic Engineering for Resistance/Tolerance Traits -- 8.10.1
Target Traits and Alien Genes -- 8.11 Future Perspectives --
References -- 9 Genomic Designing for Biotic Stress Resistance

in Sugarcane -- 9.1 Introduction -- 9.1.1 Economic Importance of Sugarcane -- 9.1.2 Reduction in Yield and Quality Due to Biotic Stresses -- 9.1.3 Growing Importance in the Face of Climate Change and Increasing Population.
9.1.4 Limitations of Traditional Breeding and Rational of Genome Designing.

2. Record Nr.	UNINA9910692062603321
Titolo	Generic environmental impact statement for license renewal of nuclear plants [[electronic resource]] : supplement : final report
Pubbl/distr/stampa	Washington, DC, : Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, 1999-
Soggetti	Nuclear power plants - Environmental aspects - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from suppl. 12 title screen (viewed on Aug. 20, 2003). Suppl. 1, 4-5, and 8-9 distributed to depository libraries in microfiche. "Date published: August 2003"--Suppl. 12. "NUREG-1437."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	suppl. 12. Fort Calhoun Station, unit 1.
