

1. Record Nr.	UNINA9910824361103321
Autore	Munjal M. L (Manchar Lal), <1945->
Titolo	Acoustics of ducts and mufflers // M.L. Munjal
Pubbl/distr/stampa	Chichester, West Sussex, United Kingdom : , : John Wiley & Sons, Inc., , 2014
ISBN	1-118-44309-8 1-118-44308-X
Edizione	[Second edition.]
Descrizione fisica	1 online resource (417 p.)
Classificazione	TEC006000
Disciplina	629.25/2
Soggetti	Air ducts - Acoustic properties Automobiles - Motors - Mufflers - Acoustic properties Ventilation - Noise Automobiles - Motors - Exhaust systems - Noise
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Revised edition of: Acoustics of ducts and mufflers with application to exhaust and ventilation system design / M.L. Munjal. 1987.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface; 1. Propagation of Waves in Ducts; 1.1 Plane Waves in an Inviscid Stationary Medium; 1.2 Three-Dimensional Waves in an Inviscid Stationary Medium; 1.2.1 Rectangular Ducts; 1.2.2 Circular Ducts; 1.3 Waves in a Viscous Stationary Medium; 1.4 Plane Waves in an Inviscid Moving Medium; 1.5 Three-Dimensional Waves in an Inviscid Moving Medium; 1.6 One-Dimensional Waves in a Viscous Moving Medium; 1.7 Waves in Ducts with Compliant Walls (Dissipative Ducts); 1.7.1 Rectangular Duct with Locally Reacting Lining; 1.7.2 Circular Duct with Locally Reacting Lining 1.7.3 Rectangular Duct with Bulk Reacting Lining 1.7.4 Circular Duct with Bulk Reacting Lining; 1.8 Three-Dimensional Waves along Elliptical Ducts; References; 2. Theory of Acoustic Filters; 2.1 Units for the Measurement of Sound; 2.2 Uniform Tube; 2.3 Radiation Impedance; 2.4 Reflection Coefficient at an Open End; 2.5 A Lumped Inertance; 2.6 A Lumped Compliance; 2.7 End Correction; 2.8 Electroacoustic Analogies; 2.9 Electrical Circuit Representation of an Acoustic System; 2.10 Acoustical Filter Performance Parameters; 2.10.1 Insertion Loss, IL; 2.10.2 Transmission Loss, TL

2.10.3 Level Difference, LD2.10.4 Comparison of the Three Performance Parameters; 2.11 Lumped-Element Representations of a Tube; 2.12 Simple Area Discontinuities; 2.13 Gradual Area Changes; 2.13.1 Conical Tube; 2.13.2 Exponential Tube; 2.13.3 Elliptical Tube; 2.14 Extended-Tube Resonators; 2.15 Helmholtz Resonator; 2.16 Concentric Hole-Cavity Resonator; 2.17 An Illustration of the Classical Method of Filter Evaluation; 2.18 The Transfer Matrix Method; 2.18.1 Definition of Transfer Matrix; 2.18.2 Transfer Matrix of a Uniform Tube; 2.18.3 A General Method for Derivation of Transfer Matrix 2.18.4 Transfer Matrices of Lumped Elements 2.18.5 Transfer Matrices of Variable Area Tubes; 2.18.6 Overall Transfer Matrix of the System; 2.18.7 Evaluation of TL in Terms of the Four-Pole Parameters; 2.19 TL of a Simple Expansion Chamber Muffler; 2.20 An Algebraic Algorithm for Tubular Mufflers; 2.20.1 Development of the Algorithm; 2.20.2 Formal Enunciation and Illustration of the Algorithm; 2.21 Synthesis Criteria for Low-Pass Acoustic Filters; References; 3. Flow-Acoustic Analysis of Cascaded-Element Mufflers; 3.1 The Exhaust Process; 3.2 Finite Amplitude Wave Effects 3.3 Mean Flow and Acoustic Energy Flux 3.4 Aeroacoustic State Variables; 3.5 Aeroacoustic Radiation; 3.6 Insertion Loss; 3.7 Transfer Matrices for Tubular Elements; 3.7.1 Uniform Tube; 3.7.2 Extended-Tube Elements; 3.7.3 Simple Area Discontinuities; 3.7.4 Physical Behavior of Area Discontinuities; 3.8 Perforated Elements with Two Interacting Ducts; 3.8.1 Concentric-Tube Resonator; 3.8.2 Cross-Flow Expansion Element; 3.8.3 Cross-Flow Contraction Element; 3.8.4 Some Remarks; 3.9 Acoustic Impedance of Perforates; 3.10 Matrizant Approach; 3.11 Perforated Elements with Three Interacting Ducts 3.11.1 Three-Duct Cross-Flow Expansion Chamber Element

Sommario/riassunto

"Fully updated second edition of the premier reference book on muffler and lined duct acoustical performance Engine exhaust noise pollutes the street environment and ventilation fan noise enters dwellings along with fresh air. People have become conscious of their working environment. Governments of most countries have responded to popular demand with mandatory restrictions on sound emitted by automotive engines, and a thorough knowledge of acoustics of ducts and mufflers is needed for the design of efficient muffler configurations. This fully updated Second Edition of Acoustics of Ducts and Mufflers deals with propagation, reflection and dissipation/absorption of sound along ducts/pipes/tubes, area discontinuities, perforated elements and absorptive linings that constitute the present-day mufflers and silencers designed to control noise of exhaust and intake systems of automotive engines, diesel-generator sets, compressors and HVAC systems. It includes equations, figures, tables, references, and solved examples and unsolved exercises with answers, so it can be used as a text book as well as a reference book. It also offers a complete presentation and analysis of the major topics in sound suppression and noise control for the analysis and design of acoustical mufflers, air conditioning and ventilation duct work. Both the fundamentals and the latest technology are discussed, with an emphasis on applications. Deals with reactive mufflers, dissipative silencers, the frequency-domain approach, and the time-domain approach. Fully updated second edition of the premier reference book on muffler and lined duct acoustical performance, in one complete volume Presents original new research on topics including baffle silencers and louvers, 3D analytical techniques, and flow-acoustic analysis of multiply-connected perforated-element mufflers Includes a general design procedure to help muffler designers in the automotive industry, exhaust noise being a major component of

automobile and traffic noise pollution Written by an expert with four decades' experience in teaching to graduate students, publishing extensively in reputed international journals, and consulting with industry for noise control as well as designing for quietness "--

2. Record Nr.	UNINA9910693526803321
Titolo	Restless legs syndrome // edited by K. Ray Chaudhuri, P. Odin, C.W. Olanow
Pubbl/distr/stampa	London : , : Taylor & Francis, , 2004
ISBN	1-135-40377-5 0-429-20991-6 1-280-14186-7 9786610141869 661014186X 0-203-49750-3
Descrizione fisica	1 online resource (160 p.)

Disciplina	616.84
Soggetti	Restless legs syndrome Sleep disorders
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	A Parthenon book.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Book cover; Title; Copyright; Contents; List of contributors; Preface; Foreword; 1. What is restless legs syndrome?; 2. Diagnostic criteria; 3. Epidemiology; 4. Pathophysiology of restless legs syndrome; 5. Clinical features; 6. Secondary restless legs syndrome; 7. Restless legs syndrome: differential diagnosis and treatment; 8. Augmentation and rebound; 9. Diagnosis of the restless legs syndrome: the use of the sleep laboratory; 10. Summary and conclusions; Index;
Sommario/riassunto	Although briefly covered in neurology texts, until now there has been no professional-level publication dedicated solely to restless legs

syndrome (RLS). Written by a panel of experts, Restless Legs Syndrome focuses on the diagnosis and management of RLS. The authors discuss the epidemiology of RLS, pathophysiology and clinical associations, and clinical features. They also explore how to correctly diagnose the many different types of patients who present with this disorder. Its discussions of the wide range of treatment options available give clinicians the information they need to formulate
