

1. Record Nr.	UNINA9910693568403321
Titolo	Colorectal cancer screening // Joseph C. Anderson, Charles J. Kahi, editors
Pubbl/distr/stampa	New York, : Humana Press/Springer, 2011
ISBN	1-60761-398-0
Edizione	[1st ed. 2011.]
Descrizione fisica	1 online resource (210 p.)
Collana	Clinical gastroenterology
Altri autori (Persone)	AndersonJoseph KahiCharles J
Disciplina	616.994347
Soggetti	Colon (Anatomy) - Cancer Rectum - Cancer Medical screening
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Colorectal Cancer Pathways -- Risk Factors and Screening for CRC -- Hereditary Adenomatous Colorectal Cancer Syndromes -- Screening and Surveillance Guidelines -- Barriers to Colorectal Cancer Screening: Patient, Physician, and System Factor -- Screening for CRC Using Colonoscopy.- New Technology for Screening CRC.- Screening for CRC using CT Colonography -- Noninvasive Screening Tests -- Removal of Difficult Colon Polyps -- Screening for CRC in the Elderly -- Chemoprevention.
Sommario/riassunto	Colorectal Cancer Screening provides a complete overview of colorectal cancer screening, from epidemiology and molecular abnormalities, to the latest screening techniques such as stool DNA and FIT, Computerized Tomography (CT) Colonography, High Definition Colonoscopes and Narrow Band Imaging. As the text is devoted entirely to CRC screening, it features many facts, principles, guidelines and figures related to screening in an easy access format. This volume provides a complete guide to colorectal cancer screening which will be informative to the subspecialist as well as the primary care practitioner. It represents the only text that provides this up to date information about a subject that is continually changing. For the primary practitioner, information on the guidelines for screening as well as

increasing patient participation is presented. For the subspecialist, information regarding the latest imaging techniques as well as flat adenomas and chromoendoscopy are covered. The section on the molecular changes in CRC will appeal to both groups. The text includes up to date information about colorectal screening that encompasses the entire spectrum of the topic and features photographs of polyps as well as diagrams of the morphology of polyps as well as photographs of CT colonography images. Algorithms are presented for all the suggested guidelines. Chapters are devoted to patient participation in screening and risk factors as well as new imaging technology. This useful volume explains the rationale behind screening for CRC. In addition, it covers the different screening options as well as the performance characteristics, when available in the literature, for each test. This volume will be used by the sub specialists who perform screening tests as well as primary care practitioners who refer patients to be screened for colorectal cancer.
