

1. Record Nr.	UNINA9910693674703321
Titolo	Physical activity and cancer // Kerry S. Courneya, Christine M. Friedenreich (editors)
Pubbl/distr/stampa	Heidelberg ; ; New York, : Springer, 2010
ISBN	1-282-97234-0 9786612972348 3-642-04231-7
Descrizione fisica	1 online resource (383 p.)
Collana	Recent results in cancer research ; ; 186
Altri autori (Persone)	CourneyaKerry S FriedenreichChristine M
Disciplina	616.994062
Soggetti	Cancer - Physical therapy Cancer - Prevention Physical fitness - Health benefits
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This book explores in depth the relation between physical activity and cancer control, including primary prevention, coping with treatments, recovery after treatments, long-term survivorship, secondary prevention, and survival. The first part of the book presents the most recent research on the impact of physical activity in preventing a range of cancers. In the second part, the association between physical activity and cancer survivorship is addressed. The effects of physical activity on supportive care endpoints (e.g., quality of life, fatigue, physical functioning) and disease endpoints (e.g., biomarkers, recurrence, survival) are carefully analyzed. In addition, the determinants of physical activity in cancer survivors are discussed, and behavior change strategies for increasing physical activity in cancer survivors are appraised. The final part of the book is devoted to special topics, including the relation of physical activity to pediatric cancer survivorship and to palliative cancer care.
