Sommario/riassunto	Problem drinking (alcohol abuse or dependence) affects 18.2 million people in the United States alone - nearly one in every 13 adults and teens ages 12 and over. Millions more Americans engage in risky drinking behaviors, such as driving under the influence or being intoxicated while having direct responsibility for another person's well-being. Alcohol misuse sharply raises the risk of illness or death from numerous health problems, including liver disease, heart disease, and some types of cancer. It also has a profound detrimental impact on society, playing a major role in many violent crimes

2. Record Nr.	UNISA996434740003316
Titolo	InterAlia : pismo powicone studiom queer

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Sommario/riassunto	"InterAlia, a peer-reviewed scholarly journal for queer theory, is open to submissions from a wide range of fields, written in English, Spanish, or Polish. Among the issues we hope our contributors will address is the translatability of queer concepts across cultural and linguistic borders; the relationship between queer theory and activism; the possibility of reconciling the different positionings within the queer community that are related to such factors as gender, race, class, age, sexual practices, and geographical location; the relevance of queer studies for understanding the discourses, cultural practices, and institutions that surround us; and the potential of queer as a counterdiscourse or counterpractice. We also publish (without the peer-review process) literary and art works, documentation of artistic and theatrical works, book reviews, manifestoes, theory-fiction,

commentaries and other materials that fall outside the rigid academic standards."--About InterAlia page (English version, viewed June 13, 2023).
