

1. Record Nr.	UNINA9910693840903321
Autore	Swanson Marianne
Titolo	Security metrics guide for information technology systems // Marianne Swanson [and four others]
Pubbl/distr/stampa	Gaithersburg, Md. : , : National Institute of Standards and Technology, Technology Administration, , 2003
Descrizione fisica	1 online resource
Collana	NIST special publication; NIST special pub; NIST SP
Altri autori (Persone)	SwansonMarianne
Disciplina	535.84
Soggetti	Computer security
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on June 23, 2004).
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This document provides guidance on how an organization, through the use of metrics, identifies the adequacy of in-place security controls, policies, and procedures. It provides an approach to help management decide where to invest in additional security protection resources or when to research the causes of nonproductive controls. It explains the metric development and implementation process and how it can also be used to adequately justify security control investments. The results of an effective metric program can provide useful data for directing the allocation of information security resources and should simplify the preparation of performance-related reports.
