Sommario/riassunto

This volume brings together prominent archaeologists working in areas outside Western Europe to discuss the most recent evidence for the origins of the early Upper Paleolithic and its relationship to the origin of modern humans. With a wealth of primary data from archaeological sites and regions that have never before been published and discussions of materials from difficult-to-find sources, the collection urges readers to reconsider the process of modern human behavioral origins. Archaeological evidence continues to play a critical role in debates over the origins of anatomically modern humans. The appearance of novel Upper Paleolithic technologies, new patterns of land use, expanded social networks, and the emergence of complex forms of symbolic communication point to a behavioral revolution beginning sometime around 45,000 years ago. Until recently, most of the available evidence for this revolution derived from Western European archaeological contexts that suggested an abrupt replacement of Mousterian Middle Paleolithic with Aurignacian Upper Paleolithic adaptations. In the absence of fossil association, the behavioral transition was thought to reflect the biological replacement of archaic hominid populations by intrusive modern humans. The contributors present new archaeological evidence that tells a very different story: The Middle-Upper Paleolithic transitions in areas as diverse as the Levant, Eastern-Central Europe, and Central and Eastern Asia are characterized both by substantial behavioral continuity over the period 45,000-25,000 years ago and by a mosaic-like pattern of shifting adaptations. Together these essays will enliven and enrich the discussion of the shift from archaic to modern behavioral adaptations. Contributors: O. Bar-Yosef, A. Belfer-Cohen, R. L. Bettinger, P. J. Brantingham, N. R. Coinman, A. P. Derevianko, R. G. Elston, J. R. Fox, X. Gao, J. M. Geneste, T. Goebel, E. Güleç, K. W. Kerry, L. Koulakovskaia, J. K. Kozłowski, S. L. Kuhn, Y. V. Kuzmin, D. B. Sommario/riassunto

Das Handbuch widmet sich erstmals systematisch und vergleichend der
Frage, wie soziale Bewegungen aus einer poststrukturalistischen
Perspektive analysiert werden können. Die Beiträge stellen verschiedene
Ansätze vor und zeigen jeweils anhand eines Beispiels aus der
Forschungspraxis, wie dieser Ansatz für die Analyse sozialer
Bewegungen genutzt werden kann. Durch die Anwendung alternativer
Methoden, die enge Verknüpfung von Theorie und Praxis und eine
gesellschaftstheoretische Perspektive werden auf diese Weise neue
Einsichten in den Forschungsgegenstand »soziale Bewegungen«
möglich.
»Deutlich werden [...] insbesondere die Vielfalt poststrukturalistischer
Perspektiven, ihre erkenntnistheoretischen Grundlagen und potenzielle
Anwendungsfelder.«
