Sozio- und Varietätenlinguistik -- 12. Lexikographie -- Bibliographie (Auswahl)
Sommario/riassunto	Dieses in zweiter Auflage überarbeitete und aktualisierte Arbeitsheft stellt ein einführendes Panorama der italienischen Sprachwissenschaft dar. Dabei richtet es sich nicht nur an Studierende der Italianistik, sondern auch an Studierende anderer Disziplinen. Neben den Methoden der modernen Linguistik und ihrer Darstellung anhand italienischer Beispiele werden auch Aspekte der Wissenschaftsgeschichte behandelt. Diese betreffen sowohl die italienische Rezeption moderner linguistischer Methoden, als auch die Beschäftigung mit sprachwissenschaftlich relevanten Themen in vorwissenschaftlicher Zeit in Italien, d.h. von den Sprachbetrachtungen Dantes über die im Rahmen der Questione della lingua entstandenen Schriften des 15. bis

17. Jahrhunderts bis zu den sprachphilosophischen und kulturhistorischen Traktaten des 18. Jahrhunderts. Im Rahmen der Teilgebiete werden die Entwicklungslinien von der antiken Sprachphilosophie bis zur modernen Linguistik nachgezeichnet. In 12 Kapiteln behandelt das Arbeitsheft Wissenschaftsgeschichte, Sprachgeschichte, Phonetik und Phonologie, Grammatiktheorie und Grammatikographie, Morphologie, Syntax, Semantik, Pragmatik, Textlinguistik, Dialektologie, Soziolinguistik sowie Lexikographie. Die zentralen Fachtermini werden durchweg in italienischer Übersetzung angegeben.

This updated new edition offers a well-written, systematic introduction to the various areas of Italian linguistics. Along with the methods of modern linguistics and their description using Italian examples, aspects of the history of research are also discussed. They concern the Italian reception of modern linguistic methods as well as work on relevant linguistic topics in the pre-scientific era in Italy.

Sommario/riassunto

Many countries around the world block or filter Internet content, denying access to information that they deem too sensitive for ordinary citizens--most often about politics, but sometimes relating to sexuality, culture, or religion. Access Denied documents and analyzes Internet filtering practices in more than three dozen countries, offering the first rigorously conducted study of an accelerating trend. Internet filtering takes place in more than three dozen states worldwide, including many countries in Asia, the Middle East, and North Africa. Related Internet content-control mechanisms are also in place in Canada, the United States and a cluster of countries in Europe. Drawing on a just-completed survey of global Internet filtering undertaken by the OpenNet Initiative (a collaboration of the Berkman Center for Internet and Society at Harvard Law School, the Citizen Lab at the University of Toronto, the Oxford Internet Institute at Oxford University, and the University of Cambridge) and relying on work by regional experts and an extensive network of researchers, Access Denied examines the political, legal, social, and cultural contexts of Internet filtering in these states from a variety of perspectives. Chapters discuss the mechanisms and politics of Internet filtering, the strengths and limitations of the technology that powers it, the relevance of international law, ethical considerations for corporations that supply states with the tools for blocking and filtering, and the implications of Internet filtering for activist communities that increasingly rely on Internet technologies for communicating their missions. Reports on Internet content regulation in forty different countries follow, with each two-page country profile outlining the types of content blocked by category and documenting key findings. Contributors Ross Anderson, Malcolm Birdling, Ronald Deibert, Robert Faris, Vesselina Haralampieva [as per Rob Faris], Steven Murdoch, Helmi Noman, John Palfrey, Rafal Rohozinski, Mary Rundle, Nart Villeneuve, Stephanie Wang, Jonathan Zittrain.
