Sommario/riassunto	The focus of this publication is on information related to tubercular diseases of animals caused by the bacterial genus Mycobacterium. Livestock diseases are mostly caused by Mycobacterium bovis and the Mycobacterium tuberculosis complex. Many species of animals are included: large ruminants, wildlife, wild animals as disease reservoirs, deer, elephants, birds, fish, etc. Topics are varied and include clinical aspects of the disease, the disease process, disease prevention and control, vaccines, immunology, bacterial genetics, zoonotic aspects etc.
