   Autore   Dray James F

   Titolo   Personal identity verification card management report [[electronic resource] /] / Jim Dray, David Corcoran

   Pubbl/distr/stampa   [Gaithersburg, Md.] : , : U.S. Dept. of Commerce, National Institute of Standards and Technology, , [2006]

   Descrizione fisica   vii, 28 pages : digital, PDF file

   Collana   NISTIR ; ; 7284

   Altri autori (Persone)   CorcoranDavid

   Soggetti   Identification - Standards
                         Identification cards

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Title from page [1], viewed March 6, 2007.
                         "January 2006."

   Nota di bibliografia Includes bibliographical references (page 28).

   Sommario/riassunto   NIST Special Publication 800-73 (http://piv.nist.gov) provides technical specifications for Personal Identity Verification (PIV) cards. However, it does not contain a complete card management specification for PIV systems. This report provides an overview of card management systems, identifies generic card management requirements, and considers some technical approaches to filling the existing gaps in PIV card management. The primary guiding principles in selecting technical approaches for consideration are that they should require no changes to the existing PIV specifications and should conform to applicable formal standards. Expanding the PIV command set to include management and personalization would result in a higher level of consistency and testability for PIV card issuance processes, enhanced ability to outsource various card management components and functions, and improved overall security for the federal PIV framework.
