Sommario/riassunto	The management of non-ST segment elevation acute coronary syndromes (NSTE-ACS) has rapidly evolved over the last few years and many guidelines have been provided and already updated. This book is based on the latest ESC Guidelines and reports the current knowledge in NSTE-ACS, together with the most recent therapeutic options and the different strategies that can be applied according to the clinical status of patients. International experts address the different aspects of NSTE-ACS and bring useful information to clinicians, interventionalists and surgeons involved in the difficul
