Sommario/riassunto	This map displays over 1,500 mineral facilities in Africa and the Middle East. The mineral facilities include mines, plants, mills, or refineries of aluminum, cement, coal, copper, diamond, gold, iron and steel, nickel, platinum-group metals, salt, and silver among others. The data used in this poster were compiled from multiple sources, including the 2004 USGS Minerals Yearbook (Africa and the Middle East volume), Minerals Statistics and Information from the USGS web site .. and data collected by USGS minerals information country specialists. Data reflect the most recent published table of industry structure for each county. ... See Table 1 for general information about each mineral facility site including country, location and facility name, facility type, latitude, longitude, mineral commodity, mining method, main operating company, status, capacity, and units.
