

1. Record Nr.	UNINA9910696362303321
Autore	Ziring Neal
Titolo	Specification for the extensible configuration checklist description format (XCCDF) [[electronic resource]] : version 1.1.3 / / Neal Ziring, Stephen D. Quinn
Pubbl/distr/stampa	Gaithersburg, MD : , : U.S. Dept. of Commerce, Techology Administration, National Institute of Standards and Technology, , [2007]
Edizione	[Revision 2.]
Descrizione fisica	viii, 118 pages : digital, PDF file
Collana	NISTIR ; ; 7275 Computer security
Altri autori (Persone)	QuinnStephen D
Soggetti	Computer security - Standards Programming languages (Electronic computers)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title page (viewed on Jan. 9, 2008). "May 2007."
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This document specifies the data model and Extensible Markup Language (XML) representation for the Extensible Configuration Checklist Description Format (XCCDF) Version 1.1.3. An XCCDF document is a structured collection of security configuration rules for some set of target systems. The XCCDF specification is designed to support information interchange, document generation, organizational and situational tailoring, automated compliance testing, and compliance scoring. The specification also defines a data model and format for storing results of security guidance or checklist compliance testing. The intent of XCCDF is to provide a uniform foundation for expression of security checklists and other configuration guidance, and thereby foster more widespread application of good security practices.
