1.	Record Nr.	UNINA9910696418203321
	Autore	Kass-Bartelmes Barbara L
	Titolo	Medical informatics for better and safer health care [[electronic resource] /] / authors, Barbara L. Kass-Bartelmes, Eduardo Ortiz
	Pubbl/distr/stampa	Rockville, Md. : , : Agency for Healthcare Research and Quality, , [2002]
	Descrizione fisica	14 pages : digital, PDF file
	Collana	Research in action ; ; issue #6 AHRQ pub. ; ; no. 02-0031
	Altri autori (Persone)	OrtizEduardo, M.D.
	Soggetti	Medicine - United States - Data processing Quality assurance - Medical care - United States Medical Informatics Applications Quality Assurance, Health Care Safety Management United States
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Title from PDF caption (viewed Mar. 12, 2008). "June 2002."
	Nota di bibliografia	Includes bibliographical references.
	Sommario/riassunto	Medical informatics deals with all aspects of understanding and promoting the effective organization, analysis, management, and use of information in health care. This report describes a select few of the computer systems that the Agency for Healthcare Research and Quality (AHRQ) has supported. These systems are relevant to the problems clinicians face, such as improving the quality of patient care and patient safety, preventing medical errors, reducing costs, helping patients manage their conditions, and minimizing the impact of bioterrorism.
