

1. Record Nr.	UNINA9910696580003321
Titolo	Earthquake intensity database search, 1638-1985 [[electronic resource] /] / National Geophysical Data Center (NGDC), NOAA Satellite and Information Service
Pubbl/distr/stampa	[Boulder, Colo.] : , : National Geophysical Data Center, , [between 1990 and 1999]
Descrizione fisica	1 electronic text : HTML, text files
Soggetti	Earthquakes - United States Earthquake intensity - United States - Measurement Earthquake magnitude - United States - Measurement
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from HTML caption on web site (viewed Apr. 11, 2008).
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Database is a collection of damage and felt reports for over 23,000 U.S. earthquakes. Also contains information regarding epicentral coordinates, magnitudes, focal depths, names and coordinates of reporting cities (or localities), reported intensities, and the distance from city (or locality) to epicenter.
