

1. Record Nr.	UNINA9910696652103321
Titolo	Inventory of onshore federal oil and natural gas resources and restrictions to their development [[electronic resource]] : 2008 Phase III inventory : onshore United States / / prepared by the U.S. Departments of the Interior, Agriculture, and Energy
Pubbl/distr/stampa	[Washington, D.C.] : , : [U.S. Dept. of the Interior, Bureau of Land Management], , 2008
Descrizione fisica	xxxiii, 392 pages : illustrations, maps, digital, PDF file ; ; 28 cm
Soggetti	Natural gas reserves - United States Petroleum reserves - United States Oil and gas leases - United States Natural gas - Prospecting - United States Petroleum - Prospecting - United States Natural gas - Law and legislation - United States Petroleum law and legislation - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from PDF title page (viewed on 05/30/2008). "BLM/WO/GI-03/002+3100/REV08"--T.p. verso. Earlier versions have been superseded by this Phase III release.
Sommario/riassunto	This EPCA Phase III Inventory includes, for the first time, the entire onshore United States. This is a detailed review of Federal oil and gas resources and constraints on their development within 18 geological provinces. In addition, the rest of the country was extrapolated from the results of these provinces studied in detail. For the Federal agencies that manage public land (principally the Bureau of Land Management and the Forest Service) and the citizens they serve, this Inventory will serve primarily as a planning tool. It provides public land managers with additional information to help develop land management plans. This report is a critical step in evaluating whether the documented

impediments and restrictions are appropriate, and to what extent they constrain oil and gas development. The Inventory examines in detail six geological provinces in addition to the twelve included in the Phase II of EPCA. These six provinces are Central Alaska (Yukon Flats portion); Southern Alaska; Eastern Oregon-Washington; the Ventura Basin in California; the Eastern Great Basin in Idaho, Nevada, Utah and Arizona; and the Williston Basin in Montana, North Dakota and South Dakota.
