

1. Record Nr.	UNINA9910696684303321
Autore	Robertson J. F
Titolo	Geologic map of the Pinedale quadrangle, McKinley County, New Mexico [[electronic resource] /] / by Jacques F. Robertson
Pubbl/distr/stampa	[Reston, Va.] : , : U.S. Dept. of the Interior, U.S. Geological Survey, , 2005
Edizione	[Version 1.0.]
Descrizione fisica	1 electronic map : HTML, digital, PDF file
Collana	Miscellaneous field studies map ; ; MF-2417
Soggetti	Geology - New Mexico - McKinley County Maps.
Lingua di pubblicazione	Inglese
Formato	Materiale cartografico a stampa
Livello bibliografico	Monografia
Note generali	Relief shown by contours and spot heights. Title from HTML index page (viewed on May 29, 2008). Includes text, 1 index map, 1 diagram, and 1 colored cross section.
Nota di bibliografia	Includes bibliographical references.

2. Record Nr.	UNINA9910865234903321
Autore	Mannina Giorgio
Titolo	Resource Recovery from Wastewater Treatment : ICWRR 2024 / / edited by Giorgio Mannina, Alida Cosenza, Antonio Mineo
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031633539 9783031633522
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (520 pages)
Collana	Lecture Notes in Civil Engineering, , 2366-2565 ; ; 524
Altri autori (Persone)	CosenzaAlida MineoAntonio
Disciplina	628
Soggetti	Environmental engineering Civil engineering Water Hydrology Refuse and refuse disposal Environmental Civil Engineering Waste Management/Waste Technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Members of the Scientific Committee of the International Conference on Wider-Uptake of Water Resource Recovery from Wastewater Treatment-ICWRR2024 -- Contents -- Resource Recovery from Wastewater -- Water Reuse and Risk Analysis: The Case Study of Corleone (Italy) Ultrafiltration Plant -- 1 Introduction -- 2 Material and Methods -- 3 Results and Discussion -- 4 Conclusions -- References -- Volatile Fatty Acids by Acidogenic Fermentation of Wasted Domestic Sludge from IFAS-MBR: The Effect of Sludge Retention Time -- 1 Introduction -- 2 Materials and Methods -- 3 Results and Discussion -- 4 Conclusions -- References -- Ammonia Adsorption and Desorption by Zeolite: The Effect of Particle Size and Flow Rate at the Case Study of Palermo University Water Resource Recovery Facility -- 1 Introduction -- 2 Materials and Methods -- 2.1 Adsorption Test -- 2.2 Desorption Test -- 2.3 Analytical Methods -- 3 Results and Discussion -- 3.1 Influence of Flow Rate and Particle Size

on Ammonium Adsorption -- 3.2 Efficiency of Ammonium Desorption
 -- 4 Conclusions -- References -- Nutrient Recovery from Columns
 Filled with Zeolite and Biochar: The Case Study of Marineo (ITALY)
 Wastewater Treatment Plant -- 1 Introduction -- 2 Material
 and Methods -- 2.1 Experimental Setup -- 2.2 Experimental Campaign
 and Analytical Methods -- 3 Results and Discussion -- 3.1 Zeolite
 and Biochar Adsorption -- 4 Conclusions -- References -- Recovery
 of Polyhydroxyalkanoate from Enriched Biomass: A Novel Sustainable
 Extraction Protocol -- 1 Introduction -- 2 Materials and Methods --
 2.1 PHA Production Pilot Plant -- 2.2 PHA Extraction Protocol
 from Biomass -- 2.3 Calculations -- 2.4 Biopolymer Characterisation
 -- 3 Results and Discussion -- 4 Conclusions -- References.
 Polyhydroxyalkanoate Production by Municipal Wasted Activated
 Sludge: The Case Study of Marineo (ITALY) Wastewater Treatment Plant
 -- 1 Introduction -- 2 Materials and Methods -- 3 Results
 and Discussion -- 4 Conclusions -- References -- Phosphorus
 Recovery from P-Enriched Solution by Biochar Activated with Chloride
 Salts -- 1 Introduction -- 2 Materials and Methods -- 2.1 Biochar
 Characterisation, Experimental Set-Up, and Laboratory Analyses -- 3
 Results and Discussion -- 3.1 Biochar Characteristics and Metal
 Adsorption -- 3.2 Phosphate Adsorption by B440 and B880 Biochars --
 4 Conclusions -- References -- Precipitation of Potassium
 from Domestic Sewage as Sylvite -- 1 Introduction -- 2 Materials
 and Methods -- 3 Results and Discussion -- 4 Conclusions --
 References -- The Evolution of Decentralised Resource Recovery-Based
 Sanitation Within a Developing Country Context: Case Study: South
 Africa -- 1 Introduction -- 2 South African Sanitation Statistics -- 3
 Evolution of Dry Sanitation Systems -- 4 Learnings Point to Non-
 sewered Flushing Systems -- 5 Closed-Loop Decentralised Sanitation
 Systems -- 6 Conclusion -- References -- Preparation of Sewage
 Sludge as Substrate for Biochar Production -- 1 Introduction -- 2
 Materials and Methods -- 2.1 Sampling -- 2.2 Pilot-Scale Thermal
 Rotary Dryer Using Biogas -- 3 Results and Discussion -- 4
 Conclusions -- References -- Methane Production from Sludge
 of High-Rate Contact Stabilization Process Through Anaerobic
 Digestion for Maximizing Energy Recovery -- 1 Introduction -- 2
 Materials and Methods -- 2.1 Test Apparatus and Operation -- 2.2
 Analytical Measurements -- 3 Results and Discussion -- 4 Conclusions
 -- References -- Nitrogen and Phosphorus Removal and Recovery
 from Municipal Wastewater by Means of Adsorption and Ion Exchange
 -- 1 Introduction -- 2 Materials and Methods -- 3 Results
 and Discussion.
 3.1 Adsorption Isotherms -- 3.2 Continuous Flow Breakthrough Tests
 -- 4 Conclusions -- References -- Experimental Investigation
 of Adsorption Water Treatment Process for Resource Recovery
 from Plating Industry Wastewater -- 1 Introduction -- 2 Materials
 and Methods -- 2.1 Experimental Setup -- 2.2 Performance Evaluation
 -- 3 Results and Discussion -- 3.1 Feasibility Assessment -- 3.2
 Economic Analysis -- 4 Conclusions -- References -- Recovery
 of the Humic Substance from the Wastewater on the Biochar Produced
 from Waste Materials Using Sorption -- 1 Introduction -- 2 Materials
 and Methods -- 2.1 Biochars as Sorbent -- 2.2 Spectrophotometric
 Sorption Determination -- 3 Results and Discussion -- 3.1 The
 Characteristics of BCs Analyzed for the Ability to Sorb HSs and FAs -- 4
 Conclusions -- References -- Recovery of Phosphorus Using a Low-
 Grade Magnesium Oxide (Industrial By-Product) as an Alternative
 Magnesium Source. The MAGNYFOS Project -- 1 Introduction -- 2
 Materials and Methods -- 2.1 Laboratory-Scale -- 2.2 Pilot Scale -- 2.3

Modelling -- 3 Results and Discussion -- 3.1 Laboratory-Scale -- 3.2 Pilot Scale -- 3.3 Precipitation Model -- 4 Conclusions -- References -- Using Biochar Recovered from Cellulose as a Novel Admixture in Nature-Based Solutions -- 1 Introduction -- 2 Materials and Methods -- 2.1 Activation and Characterization of Biochar Produced from Recovered Cellulose -- 2.2 Application of Activated Biochar in VFCWs -- 3 Results and Discussion -- 3.1 Characterization of Biochar Produced from Recovered Cellulose -- 3.2 Feasibility of Activated Biochar Produced from Recovered Cellulose -- 4 Conclusions -- References -- A Novel Strategy to Enhance High Optically Active L-lactate Production from Food Waste Upgrading by Landfill Leachate -- 1 Introduction -- 2 Materials and Methods. 2.1 FW Fermentation Inoculated with WAS Under Different Dosages of Leachate -- 3 Results and Discussion -- 3.1 Leachate Drives FW Fermentation into L-LA with High OA -- 4 Conclusions -- References -- Enhancing Volatile Fatty Acids Recovery Through Nanofiltration: A Sustainable and Efficient Solution Within the Circular Economy -- 1 Introduction -- 2 Materials and Methods -- 2.1 Materials -- 2.2 Nanofiltration Experiments -- 3 Results and Discussion -- 3.1 VFAs Concentration -- 3.2 VFAs Fractionation -- 3.3 Permeate Flux -- 3.4 Real AD Effluent Filtration -- 4 Conclusions -- References -- Nitrogen Removal and Simultaneous Phosphorus Recovery from Agro-Industrial Wastewater Through Partial Nitrification/Anammox Process -- 1 Introduction -- 2 Materials and Methods -- 2.1 Partial Nitrification/Anammox Reactor and Experimental Operation -- 2.2 Manometric and Mineral-from-Biomass Separation Tests -- 3 Results and Discussion -- 3.1 Nitrogen and Phosphorus Removal -- 3.2 Mineral-from-Biomass Separation Activity Results -- 4 Conclusions -- References -- Evaluation of Circular Performance Models in Wastewater Treatment Plants: Portugal Case-Study -- 1 Introduction -- 2 Materials and Methods -- 3 Results and Discussion -- 4 Conclusions -- References -- A New Sustainable Solvent-Free Procedure for the Recovery of Grease from Urban Sewage Sludge -- 1 Introduction -- 2 Materials and Methods -- 2.1 Sewage Sludge Characterization -- 2.2 Lipid Extraction Procedure -- 3 Results and Discussion -- 3.1 Recovery of Lipid Fraction from Sludge: Lab Scale Study -- 3.2 Recovery of Lipid Fraction from Sewage Sludge: Pilot Scale Study -- 4 Conclusions -- References -- Co-digestion of Sludge with Food Waste to Recover Valuable Products: Exploring Inoculum Substrate Ratios and pH Influences -- 1 Introduction -- 2 Materials and Methods -- 2.1 Substrate Preparation and Inoculum. 2.2 Experimental Set-Up -- 2.3 Analytical Methods -- 3 Results and Discussion -- 3.1 Impact of ISR on Different Substrates -- 3.2 Impact of pH on Different Substrates -- 4 Conclusions -- References -- Application of Machine Learning in Medium-Chain Carboxylic Acids Production from Organic Wastes -- 1 Introduction -- 2 Materials and Methods -- 2.1 Data Collection and Pretreatment -- 2.2 ML Model Development -- 3 Results and Discussion -- 3.1 MCCA Prediction Using Community Data and Operational Parameters -- 3.2 MCCA Optimization Using Operational Parameters -- 4 Conclusions -- References -- The "Water Smartness and Sustainability Index" for Assessment of Water Smartness and Sustainability of Wastewater Resource Recovery Solutions -- 1 Introduction -- 2 Materials and Methods -- 2.1 The WS&S Index -- 2.2 Data for Testing -- 3 Results and Discussion -- 4 Conclusions -- References -- Impact of Famine Length on the Structure and Performance of a PHA-Accumulating Community Under Uncoupled Feeding -- 1 Introduction -- 2 Materials and Methods -- 2.1 SBRs Set Up and Operating

Conditions -- 2.2 Analytical Methods -- 3 Results and Discussion --
3.1 Famine Extension: Impact on the PHA Accumulation -- 3.2 Famine
Extension: Impact on the Microbial Community Structure -- 4
Conclusions -- References -- Optimization of Microalgae Separation
Using Moringa oleifera Seeds and PVC Influence Through Central
Composite Rotatable Design -- 1 Introduction -- 2 Materials
and Methods -- 2.1 Study Effluent -- 2.2 MO Preparation -- 2.3
Experimental Design -- 3 Results and Discussion -- 3.1 Effluent
Characterization and Eukaryotic Community Composition -- 3.2 CCRD
for PBRs R1 and R2 and Extractions of MO -- 4 Conclusions --
References -- The Impact of the Initial N Load on the Performance
of the Integrated Technology for N and P Removal and Recovery
from Wastewater.
1 Introduction.

Sommario/riassunto

This volume highlights the latest advances, innovations, and applications in the field of water resource recovery from water treatment as presented by leading researchers at the International Conference on Wider-Uptake of Water Resource Recovery from Wastewater Treatment (ICWRR), held in Palermo, Italy on June 18-21, 2024. The event took place together with the 7th IWA Regional Membrane Technology Conference (IWA-RMTC). The contributions cover a wide range of themes from innovative and nature-based solutions for water and wastewater management to circularity assessment tools and environmental policy and legislation. The topics include resource recovery from wastewater, wastewater treatment, membrane bioreactors, greenhouse gases from wastewater treatment, LCA, water reuse & rainwater harvesting, mathematical modelling of wastewater treatment plants, metagenomics analysis and environmental microbiology, environmental policy and legislation in the water sector, plant-water-soil nexus, fertilizers from wastewater. The contributions were selected by means of a rigorous peer-review process and highlight many exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different water specialists. .
