Soggetti	Wheat - Economic aspects - India Agricultural subsidies - India
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on July 22, 2008). "May 2007." During 1998-2002, India experienced record public surpluses of wheat and rice, sharply higher Government subsidy outlays, and declining per capita consumption. By 2006, despite continued high subsidies and sluggish domestic consumption, India developed a large wheat deficit. The pronounced market cycles and declines in per capita consumption for India's major food staples are creating pressure for Indian policymakers to adjust longstanding policies.
