

1. Record Nr.	UNINA9910697022903321
Autore	Krantz T. L (Timothy L.)
Titolo	The influence of roughness on gear surface fatigue // Timothy L. Krantz
Pubbl/distr/stampa	Cleveland, Ohio : , : U.S. Army Research Laboratory, National Aeronautics and Space Administration, Glenn Research Center, , [2005]
Descrizione fisica	1 online resource (iv, 179 pages) : illustrations (some color)
Collana	NASA/TM ; ; 2005-213958
Soggetti	Gearing Materials - Fatigue - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from PDF title screen (NASA, viewed July 21, 2010). "October 2005." "ARL-TR-3134."
Nota di bibliografia	Includes bibliographical references (pages 174-179).

2. Record Nr.	UNINA9910254465303321
Autore	Keating Conrad
Titolo	Kenneth Warren and the Great Neglected Diseases of Mankind Programme : The Transformation of Geographical Medicine in the US and Beyond // by Conrad Keating
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	9783319501475
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XX, 150 p. 34 illus., 7 illus. in color.)
Collana	Springer Biographies, , 2365-0613
Disciplina	610.92273
Soggetti	Medicine Health Vaccines Infectious diseases Popular Science in Medicine and Health Vaccine Infectious Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- The Rise -- The GND Years -- Selective Primary Healthcare -- Boundaries, Frontiers, Disciplines -- The Fall -- Warren in Retrospect.
Sommario/riassunto	Kenneth Warren was a powerful figure in twentieth century medicine whose work transformed public health policy and tropical medicine, and who left a profound legacy in global health thinking. A prolific writer and researcher, Warren was respected for his scientific research, winning awards and accolades, while his later role as activist, agitator, innovator and connoisseur of science brought him international recognition. His career in medicine is remembered for three enduring achievements: · His efforts to introduce modern biomedical science to the study of infectious diseases in the developing world · The proselytising energy he brought to the ethical challenge of how to provide the most cost-effective health care to the world's poorest people · His tenure as Director of Health Sciences at the Rockefeller

Foundation, during which time he inaugurated the Great Neglected Diseases of Mankind Programme Told through personal interviews with both Warren's supporters and detractors, the story of Warren's career, inexorably interwoven with the GND programme, is a compelling narrative that has not only enduring implications for current medical research, funding and healthcare across the globe, but also a long-standing legacy for the future ways in which we combat disease in the developing world. .
