

1. Record Nr.	UNINA9910697039103321
Autore	Farley Douglas L
Titolo	Implementation of a high-speed FPGA and DSP based FFT processor for improving strain demodulation performance in a fiber-optic-based sensing system [[electronic resource] /] / Douglas L. Farley
Pubbl/distr/stampa	Hampton, Va. : , : National Aeronautics and Space Administration, Langley Research Center, , [2005]
Descrizione fisica	1 online resource (iii, 23 pages) : illustrations
Collana	NASA/TM- ; ; 2005-213791
Soggetti	Demodulation Fast Fourier transformations Fiber optics Field-programmable gate arrays Systems health monitoring Structural strain
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Dec. 14, 2010). "November 2005."
Nota di bibliografia	Includes bibliographical reference (page 9)
