Nota di contenuto	Fixed-parameter tractability results -- Parameterized complexity theory -- Relationship between parameterized complexity and traditional complexity classifications.-Applications of parameterized and exact exponential-time computation.- Implementation issues of parameterized and exact exponential-time algorithms.
Sommario/riassunto	This book constitutes the thoroughly refereed post-conference proceedings of the 9th International Symposium on Parameterized and Exact Computation, IPEC 2014, in Wroclaw, Poland, in September 2014. The 27 revised full papers presented together with one invited paper were carefully reviewed and selected from 42 submissions. The topics addressed cover research in all aspects of parameterized/exact algorithms and complexity including but are not limited to new techniques for the design and analysis of parameterized and exact algorithms, fixed-parameter tractability results; parameterized complexity theory, relationship between parameterized complexity and traditional complexity classifications; applications of parameterized and exact exponential-time computation; and implementation issues of parameterized and exact exponential-time algorithms.
