

1. Record Nr.	UNINA9910697575903321
Autore	Stagnitti Marie N
Titolo	Trends in statins utilization and expenditures for the U.S. civilian noninstitutionalized population, 2000 and 2005 [[electronic resource] /] / Marie N. Stagnitti
Pubbl/distr/stampa	[Rockville, Md.] : , : Medical Expenditure Panel Survey, Agency for Healthcare Research and Quality, , [2008]
Descrizione fisica	6 unnumbered pages : digital, PDF file
Collana	Statistical brief ; ; #205
Soggetti	Drug utilization - Economic aspects - United States Prescription pricing - United States Statins (Cardiovascular agents) - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed Sept. 12, 2008). "May 2008."
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This Statistical Brief examines trends for 3-hydroxy-3-methylglutaryl coenzyme A (HMG-CoA) reductase inhibitors, commonly know as statins, for the years 2000 and 2005. The data included in this brief are derived from 2000 and 2005 data for the U.S. civilian noninstitutionalized population from the Household Component of the Medical Expenditure Panel Survey (MEPS-HC). The brief compares 2000 and 2005 total expenditures, total number of purchases, and total number of persons purchasing, as well as average total expenditure and average number of purchases of statins for those with one or more statin purchases.
