Sommario/riassunto	A self-administered questionnaire was added to the Medical Expenditures Panel Survey (MEPS) to collect information on health care utilization, access, health status and the quality of health care received. The quality of care measures were taken from an AHRQ-sponsored instrument, the Consumer Assessments of Health Plans (CAHPS). The questionnaire was administered in late 2000 and early 2001. All of the questions refer to events experienced in the last 12 months.
