Sequels -- Conclusion -- Select bibliography -- Index.
Sommario/riassunto	This is the first scholarly study of the political and economic relationship between Louis XIV and the parlements of France, the Parlement of Paris and all the provincial tribunals. The author explains how the king managed to overcome the century-old opposition of the parlements to new legislation, and to impose upon them the strict political discipline for which his reign is known. The work calls into

question the current revisionist understanding of the reign of Louis XIV and insists that, after all, absolute government had a harsh reality at its core. When the king died in 1715, the regent, Philippe d'Orléans, after a brief attempt to befriend the parlements through compromise, resorted to the authoritarian methods of Louis XIV and perpetuated the Sun King's political and economic legacy.

Into the Legal Domain -- The European Sustainability Model: From the Global Governance Scenario to the European Picture 'Integrating' Intergenerational Justice and Accessible Governance Mechanisms -- Conceptualising and Understanding Education and Cultural Challenges for Sustainability Transformation. Raising Awareness on the Big Picture -- Facing Cultural and Education Challenges at the EU Level: Fragmentation and Multiple Solutions.

Sommario/riassunto

The book provides a comprehensive overview of the European Sustainability Model which cannot be properly understood without taking into account the global governance trends surrounding the topic. The author offers a fresh analysis of both theory and praxis of sustainable development in the open-ended process of EU integration by shedding new light on the often-overlooked role that law and legal science should have within the educational and cultural domains. The monograph explores the necessity of new conceptual and methodological approaches in order to understand the emerging educational and cultural challenges when it comes to their integration and intersection with sustainability in today's society, which desperately claims systemic transformations. .
