Sommario/riassunto	In this report, Treasury presents a series of "short-term" and "intermediate-term" recommendations that could immediately improve and reform the U.S. regulatory structure. The short-term recommendations focus on taking action now to improve regulatory coordination and oversight in the wake of recent events in the credit and mortgage markets. The intermediate recommendations focus on eliminating some of the duplication of the U.S. regulatory system, but more importantly try to modernize the regulatory structure applicable to certain sectors in the financial services industry (banking, insurance, securities, and futures) within the current framework.
