1. Record Nr. UNINA9910697918603321

Titolo	Inspectors General [[electronic resource]] : actions needed to improve audit coverage of NASA : report to congressional requesters
Pubbl/distr/stampa	[Washington, D.C.] : , : U.S. Govt. Accountability Office, , [2008]
Descrizione fisica	ii, 72 pages : digital, PDF file
Soggetti	Governmental investigations - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed Feb. 18, 2009). "December 2008." "GAO-09-88."
Nota di bibliografia	Includes bibliographical references.

2. Record Nr. UNINA9910672437103321

Titolo	Reliability and Statistics in Transportation and Communication : Selected Papers from the 22nd International Multidisciplinary Conference on Reliability and Statistics in Transportation and Communication: Artificial Intelligence in Transportation, RelStat-2022, October 20-21, 2022, Riga, Latvia / / edited by Igor Kabashkin, Irina Yatskiv, Olegas Prentkovskis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-26655-2
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (542 pages) : illustrations
Collana	Lecture Notes in Networks and Systems, , 2367-3389 ; ; 640
Disciplina	380.5 380
Soggetti	Computational intelligence Transportation engineering Traffic engineering Statistics Computational Intelligence Transportation Technology and Traffic Engineering Statistics in Engineering, Physics, Computer Science, Chemistry and Earth Sciences

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes author index.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This book reports on cutting-edge theories and methods for analyzing complex systems, such as transportation and communication networks and discusses multi-disciplinary approaches to dependability problems encountered when dealing with complex systems in practice. The book presents the most relevant findings discussed at the 22nd International Multidisciplinary Conference on Reliability and Statistics in Transportation and Communication (RelStat), which took place on October 20 – 21, 2022, in Riga, Latvia, in hybrid mode. It spans a broad spectrum of advanced theories and methods, giving a special emphasis to the integration of artificial intelligent concepts into reliability approaches. .
