

1. Record Nr.	UNINA9910697996503321
Autore	Intelmann Steven S
Titolo	Comments on hydrographic and topographic LIDAR acquisition and merging with multibeam sounding data acquired in the Olympic Coast National Marine Sanctuary [[electronic resource] /] / Steven S. Intelmann
Pubbl/distr/stampa	Silver Spring, Md. : , : U.S. Dept. of Commerce, National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management, National Marine Sanctuary Program, , 2006
Descrizione fisica	iii, 18 pages : digital, PDF file
Collana	Marine sanctuaries conservation series ; ; ONMS-06-05
Soggetti	Optical radar Sounding and soundings - Evaluation Hydrographic surveying - Washington (State) - Olympic Coast National Marine Sanctuary - Evaluation Bathymetric maps - Evaluation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Dec. 30, 2008). "August 2006."
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The Olympic Coast National Marine Sanctuary's "objectives for the survey effort were three-fold: 1) to obtain existing conditions of the nearshore bathymetry and intertidal zone along a select portion of shoreline that is not ascertainable through ship-based acoustic data acquisition techniques due to hazardous surf conditions, 2) to assess the performance of [airborne LIDAR bathymetry] technology along both exposed and unexposed stretches of coastline, and 3) to vertically transform the ALB data and assess agreement with existing shallow water multibeam bathymetry data collected in the same area."
