Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on June 16, 2006). "March 2006."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introd. -- Survey Area -- Sonar Acquisition -- Sonar Data Processing and Image Classification -- Groundtruthing -- Survey Results and Interpretation -- Discussion and Conclusions -- Acknowledgments -- References -- Appendix.
Sommario/riassunto	Describes collection of high resolution bathymetric data in the Olympic Coast National Marine Sanctuary by the NOAA ship Rainier during 2001-2004, using multibeam echosounders. Discusses how video, bathymetry data, sediment samples, and backscatter imagery were integrated to describe the geological and biological habitat, and how the data can be used with a GIS for display, query, and analysis. These survey operations were conducted through a partnership between

NOAA's Office of Coast Survey (OCS), NOAA's National Marine Sanctuary Program (NMSP), and NOAA's Office of Marine and Aviation Operations (NMAO).
