

1. Record Nr.	UNINA9910555299203321
Titolo	Assisted reproduction techniques : challenges and management options // edited by Khaldoun Sharif, Arri Coomarasamy
Pubbl/distr/stampa	Chichester, West Sussex, England : , : Wiley Blackwell, , [2021] ©2021
ISBN	1-119-62212-3 1-119-62221-2 1-119-62211-5
Edizione	[Second edition.]
Descrizione fisica	1 online resource
Disciplina	616.69206
Soggetti	Human reproductive technology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Section 1: Counseling and preparation -- Section 2: Pituitary suppression and ovarian stimulation phase -- Section 3: Oocyte retrieval -- Section 4: Embryo transfer -- Section 5: The luteal phase -- Section 6: The ART laboratory -- Section 7: The male patient -- Section 8: The ART pregnancy -- Section 9: General and organizational issues -- colleague
Sommario/riassunto	Assisted reproduction techniques have led to the birth of 8 million babies worldwide Assisted reproduction techniques (ART), in particular in-vitro fertilization and intra-cytoplasmic sperm injection, are the most advanced forms of infertility treatment. They involve numerous counseling, medical, surgical and laboratory-based steps. At each step various problems and complications could be encountered that challenge even the most experienced ART practitioners. Moreover, patients with complex medical disorders may require ART, presenting further challenges. Assisted Reproduction Techniques will stimulate resourceful thinking in the ART practitioner when faced with these challenges. It outlines various management options, the reasoning behind them, and the evidence on which they are based to enable the practitioner to choose the most suitable solution for the needs of each

patient. Written by 171 internationally renowned experts, Assisted Reproduction Techniques follows the patient's journey throughout the whole ART process, with chapters on: Counseling and preparation Pituitary suppression and ovarian stimulation Oocyte retrieval Embryo transfer The luteal phase The ART laboratory The male patient The ART pregnancy General and organizational issues Each of the 116 concise chapters includes clinical cases, background, evidence-based practical management options, preventive measures, key-point summaries of the important details and answers to questions patients ask. Assisted Reproduction Techniques first edition has established its place as a "must read" for ART trainees and practitioners alike, and in this second edition all chapters have been updated, with the addition of new ones addressing training issues, organizational and business skills, and social media use in ART.

Selections From FBI Files -- Appendix 2. List Of Documentary Supplements -- Notes -- Acknowledgments -- Credits -- Index
Sommario/riassunto	The Los Angeles Times called the first volume of The Gold and the Blue

"a major contribution to our understanding of American research universities." This second of two volumes continues the story of one of the last century's most influential figures in higher education. A leading visionary, architect, leader, and fighter for the University of California, Clark Kerr was chancellor of the Berkeley campus from 1952 to 1958 and president of the university from 1958 to 1967. He saw the university through its golden years-a time of both great advancement and great conflict. This absorbing memoir is an intriguing insider's account of how the University of California rose to the peak of scientific and scholarly stature and how, under Kerr's unique leadership, it evolved into the institution it is today. In Volume II: Political Turmoil, Kerr turns to the external and political environment of the 1950's and 1960's, contrasting the meteoric rise of the University of California to the highest pinnacle of academic achievement with its troubled political context. He describes his attempts to steer a middle course between attacks from the political Right and Left and discusses the continuing attacks on the university, and on him personally, by the state Un-American Activities Committee. He provides a unique point of view of the Free Speech Movement on the Berkeley campus in the fall of 1964. He also details the events of January 1967, when he was dismissed as president of the university by the Board of Regents.
