

1. Record Nr.	UNINA9910698077503321
Autore	Shaltens Richard K
Titolo	Comparison of conceptual designs for 25 KWe advanced Stirling conversion systems for dish electric applications [[electronic resource] /] / Richard K. Shaltens and Jeffrey G. Schreiber
Pubbl/distr/stampa	[Washington, D.C.] : , : National Aeronautics and Space Administration, , [1989]
Descrizione fisica	11 pages : digital, PDF file
Collana	NASA TM ; ; 102085
Altri autori (Persone)	Schreiber Jeffrey G
Soggetti	Engine design Free-piston engines Heat pipes NASA programs Parabolic reflectors Solar dynamic power systems Solar energy conversion Spacecraft power supplies Stirling cycle Stirling engines
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed Feb. 3, 2009) "Work performed for U.S. Department of Energy, Conservation and Renewable Energy, Office of Solar Heat Technologies."
