

1. Record Nr.	UNINA9910698248103321
Autore	Solis William M
Titolo	Defense management [[electronic resource]] : attention is needed to improve oversight of DLA prime vendor program
Pubbl/distr/stampa	Washington, DC : , : U.S. Government Accountability Office, , [2006]
Descrizione fisica	14 pages : digital, PDF file
Soggetti	Logistics - Management Public contracts - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Aug. 23, 2006). Author: William M. Solis. "June 19, 2006." Paper version available from: U.S. Government Accountability Office, 441 G St., NW, Rm. LM, Washington, D.C. 20548. "GAO-06-739R."
Nota di bibliografia	Includes bibliographical references.

2. Record Nr.	UNINA9910815619203321
Autore	Klein Evelyn R.
Titolo	Acquired language disorders : a case-based approach / / Evelyn R. Klein, James M. Mancinelli
Pubbl/distr/stampa	San Diego, California : , : Plural Publishing, Inc., , [2021] ©2021
ISBN	1-63550-098-2
Edizione	[Third edition.]
Descrizione fisica	1 online resource (xvii, 327 pages) : illustrations
Disciplina	616.855075
Soggetti	Language disorders - Diagnosis Case Reports
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"Acquired Language Disorders: A Case-Based Approach, Third Edition, is a practical, easy-to-follow, informative guide for students and clinicians. The authors present each case from an impairment-based perspective with practical application to improving activities of daily living, as well as a social interactive perspective to create a wholistic picture of each case. For people with aphasia, clinicians are encouraged to consider not only language but also executive functions, attention, memory, and visuospatial skills. Information in the text coordinates the assessment process to a treatment plan informed by the Aphasia: Framework for Outcome Measurement (A-FROM) model, an expansion from the World Health Organization (WHO) International Classification of Functioning, Disability and Health (ICF). This edition begins with a review of the basics of brain-behavior relationships and pertinent medical terminology for treating individuals who have a neurological impairment. Each disorder is then introduced in a case-based format that includes a case scenario with a photo, functional analysis of the patient, critical thinking/learning activities, a diagnostic profile, the new Target Assessment Snapshot, treatment considerations, and a Venn diagram of the A-FROM Model with patient goals for each case. Special features include "Test Your Knowledge" sections based on 10

patient scenarios along with an answer key, a Quick Reference Diagnostic Chart for ALDs, and a Functional Communication Connections Worksheet for treatment planning purposes"--
