Sommario/riassunto	Features a community drug alert bulletin concerning methylenedioxymethamphetamine (MDMA), or ecstasy, Gamma-hydroxybutyrate (GHB), Rohypnol, ketamine, methamphetamine, and lysergic acid diethylamide (LSD), collectively known as "club drugs" for their prominence at night clubs and parties. Describes the street name, effects and reasons for use, and medical consequences of each drug, provided by the National Institute of Drug Abuse (NIDA) within the U.S. National Institutes of Health (NIH).
