

1. Record Nr.	UNINA9910698579303321
Autore	Carlson Kathleen
Titolo	The Assessment and Treatment of Individuals with History of Traumatic Brain Injury and Post-Traumatic Stress Disorder : A Systematic Review of the Evidence // Kathleen Carlson, Shannon Kehle, and Laura Meis
Pubbl/distr/stampa	Washington, D.C. : , : Department of Veterans Affairs (US), , 2009
Descrizione fisica	1 online resource (v, 72 pages)
Disciplina	617.14
Soggetti	Brain - Wounds and injuries - Diagnosis Technical reports. United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Evidence-based synthesis program." "August 2009."
Nota di bibliografia	Includes bibliographical references (pages 36-42).
Sommario/riassunto	United States (U.S.) Veterans Affairs (VA) and Department of Defense (DoD) healthcare facilities are increasingly serving a large population of Operation Enduring Freedom and Operation Iraqi Freedom (OEF/OIF) veterans who have sustained traumatic brain injury (TBI), suffer from post-traumatic stress disorder (PTSD), or have both a history of TBI and current PTSD (TBI/PTSD). Current evidence-based practices to screen, diagnose, prospectively evaluate, and treat mTBI symptoms or PTSD may be less accurate or effective if and when these conditions co-occur. Thus, there is a need to develop an evidence base to identify best practices to define, diagnose, evaluate, and manage patients with mTBI/PTSD, particularly in U.S. veterans of OEF/OIF.
