Sommario/riassunto	The Department of Defense (DOD) relies on a global network of DOD and non-DOD infrastructure so critical that its unavailability could have a debilitating effect on DOD's ability to project, support, and sustain its forces and operations worldwide. DOD established the Defense Critical Infrastructure Program (DCIP) to assure the availability of mission-critical infrastructure. GAO was asked to evaluate the extent to which DOD has (1) incorporated aspects of DCIP into its exercises in the Transportation Defense Sector and (2) developed DCIP training standards departmentwide and made installation personnel aware of existing DCIP expertise.
