

1. Record Nr.	UNINA9910698803803321
Titolo	Nuclear security [[electronic resource]] : better oversight needed to ensure that security improvements at Lawrence Livermore National Laboratory are fully implemented and sustained : report to congressional committees
Pubbl/distr/stampa	[Washington, D.C.] : , : U.S. Govt. Accountability Office, , [2009]
Descrizione fisica	ii, 36 pages : digital, PDF file
Soggetti	Nuclear facilities - Security measures - United States Nuclear energy - Research - Laboratories - Security measures - United States National security - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Apr. 16, 2009). "March 2009." "GAO-09-321."
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Energy's (DOE) security inspection at Lawrence Livermore National Laboratory (LLNL) found significant weaknesses, particularly in LLNL's protective force's ability to assure the protection of weapons-grade (special) nuclear material. LLNL is overseen by the National Nuclear Security Administration (NNSA), a separately organized agency within DOE, and managed by a contractor. NNSA is planning to remove most of the special nuclear material from LLNL. GAO was asked to (1) characterize security deficiencies identified in the 2008 inspection; (2) determine the factors that contributed to these deficiencies; (3) identify LLNL's corrective actions to address security deficiencies; and (4) assess LLNL's plan to permanently remove the riskiest special nuclear material from its site.
