

1. Record Nr.	UNINA9910698813403321
Autore	Feinstein D. T
Titolo	Hypothetical modeling of redox conditions within a complex ground-water flow field in a glacial setting [[electronic resource] /] / by Daniel T. Feinstein and Mary Ann Thomas ; National Water-Quality Assessment Program
Pubbl/distr/stampa	Reston, Va. : , : U.S. Geological Survey, , 2009
Descrizione fisica	vii, 28 pages : digital, PDF file
Collana	Scientific investigations report ; ; 2008-5066
Altri autori (Persone)	ThomasMary Ann
Soggetti	Groundwater flow - New York (State) - Broome County - Mathematical models Groundwater - Pollution - New York (State) - Broome County Water - Carbon content - New York (State) - Broome County
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on June 2, 2009).
Nota di bibliografia	Includes bibliographical references (pages 25-27).
