1.	Record Nr.	UNINA9910698869403321
	Titolo	Defense logistics [[electronic resource]] : lack of key information may impede DOD's ability to improve supply chain management : report to congressional committees
	Pubbl/distr/stampa	[Washington, D.C.] : , : U.S. Govt. Accountability Office, , [2009]
	Descrizione fisica	ii, 46 pages : digital, PDF file
	Soggetti	Inventory control - Automation Radio frequency identification systems Business logistics - United States - Management United States Armed Forces Supplies and stores Management
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Title from PDF cover screen (viewed on Jan. 13, 2009). "January 2009." "GAO-09-150."
	Nota di bibliografia	Includes bibliographical references.
	Sommario/riassunto	As a result of weaknesses in DOD's management of its supply chain, this area has been on GAO's list of high-risk federal government programs since 1990. DOD released its Logistics Roadmap in July 2008 to guide, measure, and track logistics improvements. DOD has identified two technologies included in this roadmap, item unique identification (IUID) and passive radio frequency identification (RFID), as having promise to address weaknesses in asset visibility. GAO reviewed (1) the extent to which the roadmap serves as a comprehensive, integrated strategy to improve logistics; and (2) the progress DOD has made implementing IUID and passive RFID.
