Record Nr.	UNINA9910699595803321
Autore	Capesius Joseph P
Titolo	Regional regression equations for estimation of natural streamflow statistics in Colorado [[electronic resource] /] / by Joseph P. Capesius and Verlin C. Stephens ; prepared in cooperation with the Colorado Water Conservation Board and the Colorado Department of Transportation
Pubbl/distr/stampa	Reston, Va. : , : U.S. Dept. of the Interior, U.S. Geological Survey, , 2009
Descrizione fisica	1 online resource (iv, 46 pages) : illustrations, map
Collana	Scientific investigations report ; ; 2009-5136
Altri autori (Persone)	StephensVerlin C
Soggetti	Stream measurements - Colorado Streamflow - Colorado Regression analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from PDF title screen (viewed on Dec. 9, 2010).
Nota di bibliografia	Includes bibliographical references (pages 29-31).
Nota di contenuto	Description of study area Previous studies Regional regression equations for estimation of natural streamflow statistics in Colorado Definition of hydrologic regions of Colorado Selection of stations Selection of stations for peak-streamflow statistics Selection of stations for other streamflow statistics Computation of streamflow statistics and basin and climatic characteristics Peak-streamflow frequency Annual- and monthly-mean streamflow and flow- duration curves Minimum and maximum 7-day streamflow Basin and climatic characteristics Computation of regional regression equations Generalized least-squares regression Weighted least- squares regression Discussion of selection of variables Application and limitations of regional regression equations.
