<b>Sommario/riassunto</b>	This paper focuses on the IMF report on detailed assessment of observance of Basel Core Principles (BCP) for effective banking supervision in Canada. The Canadian banking supervisor (OSFI) adopts a close and cooperative approach that supports the close network of federal authorities in identifying and seeking to mitigate prudential risks to the federal system. As a world-leading regulator, OSFI could be expected to issue a comprehensive suite of risk management standards to be available to all banks, even if at a relatively high level or based largely on Basel Committee for Banking Supervision guidance.
