

1. Record Nr.	UNINA9910700903103321
Titolo	Program update [[electronic resource]] : proposal of emission control area to reduce emissions from ships in the U.S. Caribbean
Pubbl/distr/stampa	[Washington, D.C.] : , : U.S. Environmental Protection Agency, Office of Transportation and Air Quality, , [2010]
Descrizione fisica	1 online resource (6 pages) : color maps
Collana	Regulatory announcement
Soggetti	Air quality - Standards - United States Marine engines - Standards - United States Air - Pollution - Law and legislation - United States Air - Pollution - United States - Management Marine pollution - United States - Management Motor vehicles - Pollution control devices
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed Oct. 13, 2010). "August 2010"--P. [1]. "EPA-420-F-10-041"--P. [1].
Sommario/riassunto	"The United States has submitted a proposal to the International Maritime Organization to designate an area off the coasts of Puerto Rico and the U.S. Virgin Islands in which stringent international emission controls would apply to engines and fuels on ships operating in the area. When adopted, this control program would dramatically reduce air pollution from ships and deliver substantial benefits to the population of those U.S. territories, as well as to marine and terrestrial ecosystems. This fact sheet contains an overview of the proposal."
