

1. Record Nr.	UNINA9910700909803321
Autore	Wei Eugene
Titolo	Solute dispersion modeling in New York harbor [[electronic resource]] / Eugene Wei, Theodore Caplow, Peter Schlosser
Pubbl/distr/stampa	Silver Spring, Md. : , : National Oceanic and Atmospheric Administration, U.S. Dept. of Commerce, National Ocean Service, Office of Coast Survey, Coast Survey Development Laboratory, , [2004]
Descrizione fisica	1 online resource (vii, 45 pages) : illustrations, maps (some color)
Collana	NOAA technical report NOS CS ; ; 18
Altri autori (Persone)	CaplowTheodore SchlosserPeter
Soggetti	Harbors - New York (State) - Hydrodynamics - Simulation methods Harbors - New Jersey - Hydrodynamics - Simulation methods Tidal currents - New York Harbor (N.Y. and N.J.) - Simulation methods Water levels - New York Harbor (N.Y. and N.J.) - Simulation methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from PDF title screen (viewed Nov. 2, 20110). "May, 2004."
Nota di bibliografia	Includes bibliographical references (page 45).

2. Record Nr.	UNINA9910807971003321
Autore	Shorter Edward
Titolo	How everyone became depressed : the rise and fall of the nervous breakdown / / Edward Shorter
Pubbl/distr/stampa	Oxford, [England] ; ; New York, [New York] : , : Oxford University Press, , 2013 ©2013
ISBN	0-19-997825-5 0-19-756330-9 0-19-994809-7
Descrizione fisica	1 online resource (x, 256 pages)
Collana	Oxford scholarship online
Disciplina	616.85/27
Soggetti	Depression, Mental Stress (Psychology)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 2013.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Nerves as a problem -- Rise of nervous illness -- Fatigue -- Anxiety -- Melancholia -- Nervous breakdown -- Paradigm shift -- Something wrong with the label -- Drugs -- Return of the two depressions -- Nerves redux.
Sommario/riassunto	In this work, Edward Shorter, a professor of psychiatry & the history of medicine argues for a return to the old fashioned concept of nervous illness. These are, he writes, diseases of the entire body, not the mind, & as was recognized as early as the 1600s. Shorter traces the evolution of the concept of 'nerves' & the 'nervous breakdown' in western medical thought. He points to a great paradigm shift in the first third of the 20th century that transferred behavioural disorders from neurology to psychiatry, spotlighting the mind, not the body. The catch-all term 'depression' now applies to virtually everything, 'a jumble of non-disease entities, created by political infighting within psychiatry, by competitive struggles in the pharmaceutical industry, and by the whimsy of the regulators.' Depression is a & very serious illness - it should not be diagnosed without regard to the rest of the body.
